

Optional Accessories to Complete your Schweizer 300

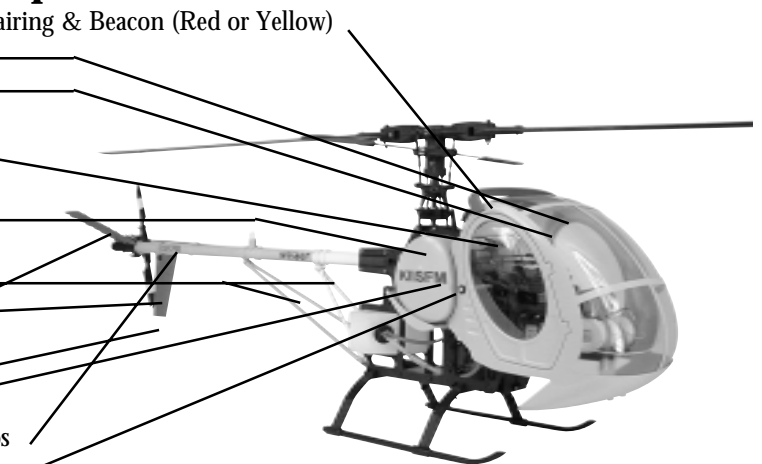

To truly make your Schweizer 300 scale, the high performance 3 blade scale rotor head is available. This rotor head consists of an all metal assembly, dual ball bearing aluminum main blade grips which feature the I.D.G. system (Individual grip damping) to dampen each blade individually to eliminate turbulence vibration which is crucial for super smooth flying with Century's multiple rotor blades. Century makes all the components required for this conversion: head assembly, 3 blade swashplate, custom follower and main rotor blades. Available for both 8 and 10mm main shafts.

CN1113	Multi 3 blade rotor head (30/46 size)
CN1107-0	Multi swashplate conversion ring w/ball end
CN1107-3	Swashplate - 3 blade (8 & 10mm shaft)
CN1108	Swashplate Follower (8 & 10mm shaft) - Keeps swashplate timed to main blades
CN2327A	3 Blade Multi Main Blade Set (550mm)
